

A person in a suit is shown from the waist down, holding a brown leather satchel with a book inside. The background is a dark green grid with various mathematical symbols and formulas like  $a \times b$ ,  $P = 2k + z$ ,  $|a \times p|$ , and  $\theta$ .

# WELCOME TO STUDENT RANGER 101

*UNCG Police Department*

*From College to Career and Beyond*

# UNCG Student Ranger Program

- Established in 2010 as part-time Student Security Officers
  - Supplemental manpower for non-emergency calls (e.g. escorts, unlocks, etc)
  - This mentoring approach gives students the opportunity to explore a career in law enforcement before they commit to the attending the academy and it gives us the opportunity to identify talented individuals with campus experience.
  - Successful and talented candidates progress through three stages before becoming a police officer. Several continue their education while pursuing a rewarding career in campus law enforcement.
  - Upon graduation, selected Student Rangers can transition to full-time security, be sponsored to attend BLET, and eventually hired as a police officer.
-

# UNCG Student Ranger Program Impact

- Students make better campus police officers because they are recruited from within and cultivated for policing in a campus environment with a community oriented approach.
  - The program has improved our diversity by approximately 20% and dramatically increased the educational level of our officers. This has been our most effective method of recruiting a diversity and educated workforce.
  - Currently there are eight former Rangers working in a full-time capacity as police and/or security. Two of them recently graduated from BLET and two are attending the academy. There are four new freshmen beginning the program this semester and we are actively recruiting from the Financial Aid Federal Work Study pool and other career service sources.
