**Discussion Item**

AAC – 3      **UNCG’s Approach to Supporting Student Well-being**

**Background Information**

Building off the previous presentation on student mental health at UNCG, this presentation will provide an overview of the comprehensive approach utilized by the Division of Student Affairs and campus partners to support student well-being. It is broadly understood that well-being is connected to student success and persistence. Supporting students' well-being requires multiple strategies, successful partnerships, and the development of a strong network of support for students. These efforts, part of UNCG's culture of care, have been particularly important in supporting students during the pandemic.
